PARTICIPATION & TOGETHERNESS

In the current competitive world, individual goals often take precedence, overshadowing collective objectives. While personal aspirations are essential, recognizing and working towards group goals is even more beneficial. Togetherness allows for the sharing of ideas, collaboration, and problem-solving.

Combining strengths with others amplifies our capabilities, fostering a sense of community and connection. Empathy and understanding develop as we share experiences, broadening our awareness of the world's impact on our actions. Togetherness offers vital support for success, whether in personal or professional life.

Human social involvement inherent, crucial for well-being, and a fundamental need. In a democratic context, participation is key, as it sustains democracy itself. In college life, participation in activities fosters a sense of belonging, making the experience more memorable and meaningful. Cultivating a culture of participation is the path to success, enriching lives and fostering togetherness.

As the famous writer William Arthur Ward said:

Do more than belong: participate.

Do more than care: help.

Do more than believe: practice.

Do more than be fair: be kind.

Do more than forgive: forget.

Do more than dream: work.

Do more than teach; inspire.

Do more than earn; enrich.

Do more than give; serve.

Leading the Future

The day started with lots of excitement and little bit of nervousness. We all students as SDC members had reached the venue by 9.30 am. We all started with work which was to be completed carefully. My experience, as the president, from the program was really amazing and by the program I got to learn many things which I can improve & implement for the next program. I also had some good experience and some bad experience which I and my team has to improve.

Looking forward to a great year and many more experiences.

I am humbled by the honour given to me in the inauguration of S.D.C. My huge thanks to the faculty of the college for entrusting me the role of the President. It is my assurance that the students will be lead towards their development.

I would like to thank the Student development Cell who organized the freshers for us. It was great, we all had a lot of fun with the music and the food. But there seemed to be a little shortage of space, the sound system could have been a little improved but still the main thing is that the classroom arrangement has been fully utilized in the limited space. And the room decoration was very eye catching. I just thank all the teachers and seniors SDC Team.

First of all thanks to all the teachers and SDC who organised this beautiful event and all the people who were part of it. It was really nice and everything went so well, here I got some points which could've made it more beautiful.

1. The food quality could've been better 2. Some guys were not enjoying program they were on their phone and everyone was leaving to early. 3. It could've been more interesting if menu could've been changed. This are some things that I feel personally rather than this program was great.
